

## **Module 6 - A201 - Details on Acquiring Standards - Based ITS Systems**

### **Webinar Chat Transcript**

Date: August 26, 2011, 12-2:00 p.m. ET

#### **Learning Assessment 1: Regards to purchased NTCIP “conformant” traffic controllers:**

Did you specify any special features or functions that were not part of a standard?

Did the vendor provide any special features unique for your operation?

Were they interchangeable with the previous traffic controllers (without changes to your cabinets or systems)?

#### **Answers:**

Not voting because it's not applicable

2. Detailing and procuring as per the documents and every word on the document

DMS--to provide messages to travelers

ATIS application using connected vehicles

DMS - travel times, CCTV - traffic management, ramp meters - main line flow
