European Truck Platooning Challenge

During its Presidency of the European Union in 2016, the Netherlands has initiated a European Truck Platooning Challenge. Six brands of automated trucks - DAF Trucks, Daimler Trucks, Iveco, MAN Truck & Bus, Scania and Volvo Group - have been driving in columns (platooning), on public roads from several European cities to the Netherlands. The aim of the Challenge was to bring platooning one step closer to implementation.

Erik Jonnaert (ACEA), Steve Phillips (CEDR), Marc Billiet (IRU), Servi Beckers (EReg), Paul Schockmel (Clep) and Godfried Smit (ESC) signed a declaration of joint commitment to truck platooning.

CONTACT

If you would like to contribute (reports, presentations, conferences, etc.) you can do so via email to: tom.alkim@rws.nl. For questions you can also visit the [LinkedIn](#) page.

Welcome to Knowledgeagenda Automated Driving, an initiative of the Dutch project group on self driving vehicles (ZRA) of the Ministerie van Infrastructuur en Milieu, Rijkswaterstaat en the RDW, to provide an online overview of available and required knowledge in the field of automated driving or self driving vehicles. The overview is divided into a number of knowledge areas. In the [documents-library](#) you will find our collection of reports, papers and presentations including summaries and background information. On April 14, 2015 we presented the research agenda of the working group ZRA, and the knowledge still needed for each domain was identified in a number of workshops, the results can be found [here](#). You can also find a list of relevant [conferences and events](#) on the site and a collection of [videos and webinars](#). News and current developments through the library and twitter feed (#KARNL) maintained by us.
