The USDOT Offers Free ITS Training

The USDOT's Professional Capacity Building (PCB) Program:

- Established by congressional legislation to build and sustain a capable and technically proficient ITS workforce
- Provides comprehensive, accessible, flexible ITS learning for the transportation industry
- Focused on transportation professionals - develop their knowledge, skills, and abilities while furthering career paths

- 
- ✓ **Increase your knowledge of ITS technologies**
 - ✓ **Excel at your career**
 - ✓ **Advance the mission of your organization**

Achieve your ITS learning goals. Visit: www.pcb.its.dot.gov/training.aspx

ITS PCB Program Background

- Part of U.S. DOT ITS Joint Program Office (ITS JPO)
- Authorized by Congress in [1996](#) to develop the workforce competencies to transform the transportation infrastructure through ITS
- Reauthorized by the 2012 Moving Ahead for Progress in the 21st Century ([MAP-21](#)) & reaffirmed by the 2016 Fixing America's Surface Transportation Act ([FAST Act](#))
- In 2010 embarked on new strategic direction:
 - Develop [new ITS content](#) and fill gaps in existing content.
 - Build [partnerships](#) to direct learning to the right audiences.
 - Move to [cost-effective](#), engaging [delivery methods](#).
- Ever increasing effort to expand coordination with wider (non-Federal) partners: Academia & Professional Associations

ITS PCB Partners

FUTURE PARTNERS

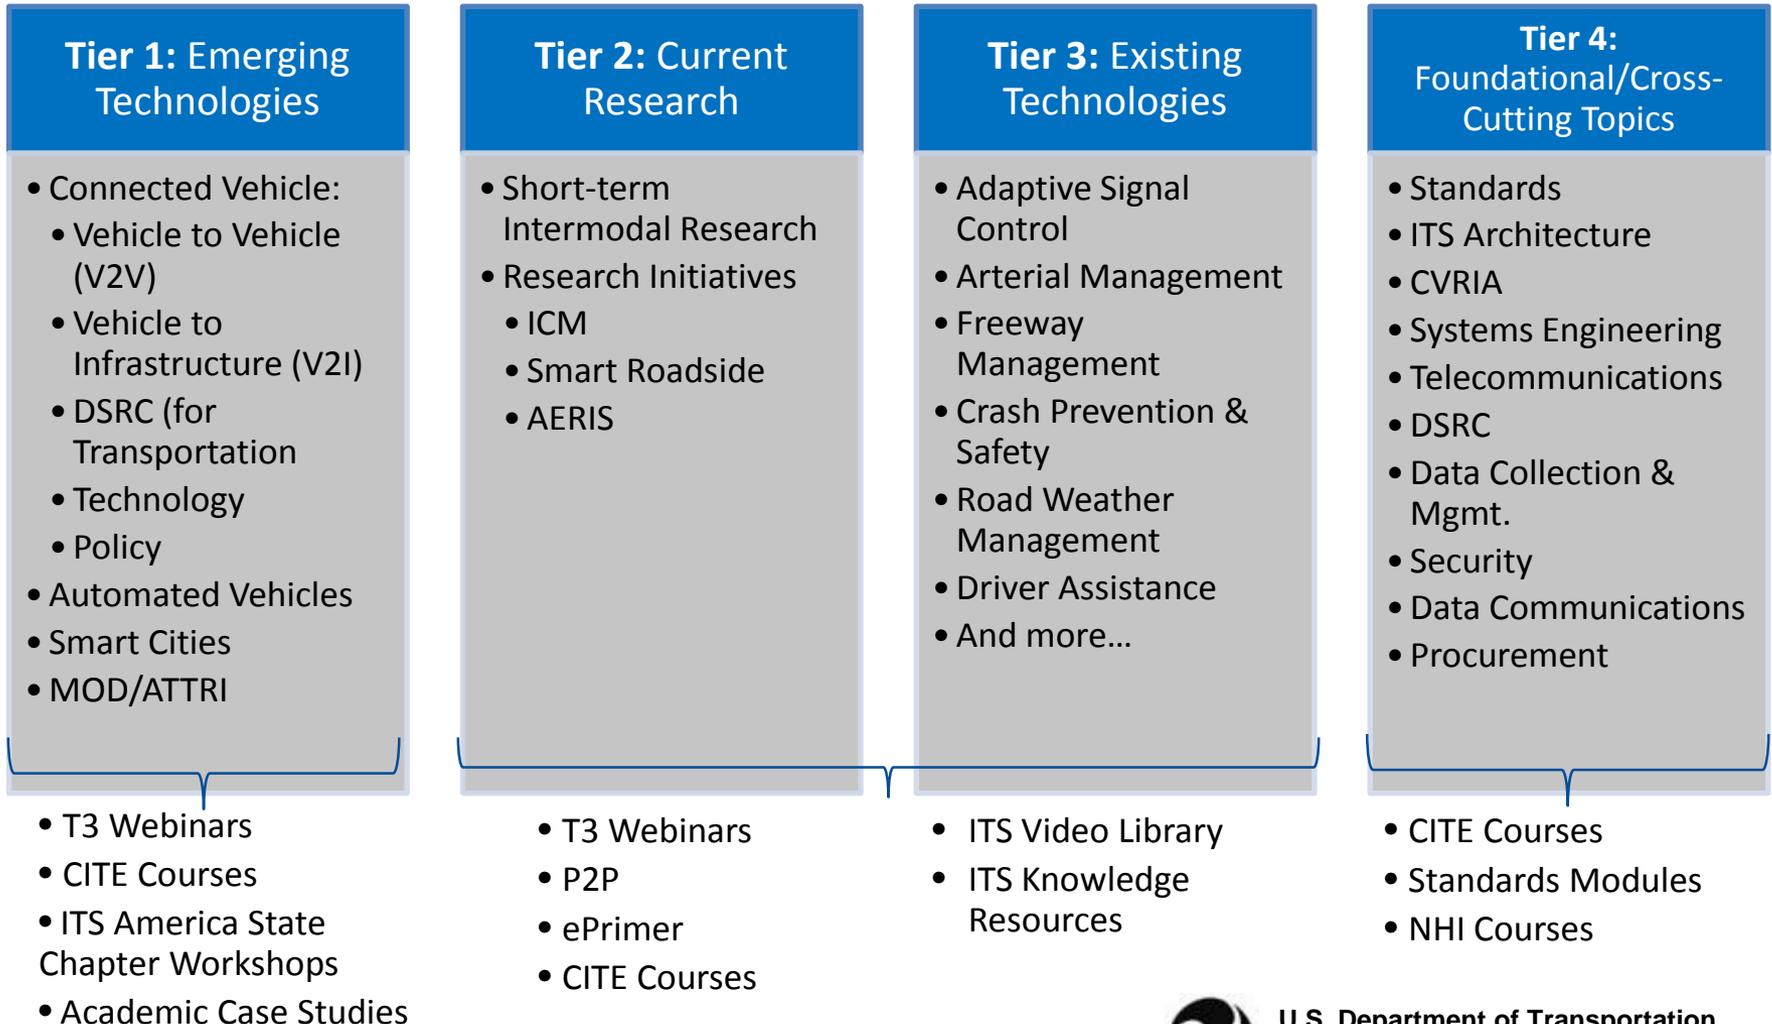

- SAE International
- IEEE
- NACo
- AMPO
- MARAD
- International Road Federation
- Transportation Workforce Centers
- USDOT FMCSA

OFFICE OF THE ASSISTANT SECRETARY FOR RESEARCH AND TECHNOLOGY
University Transportation Centers

ITS PCB Program Content

Targeted delivery, through strategic use of partners:

Partnering with Higher Education

The USDOT looks to colleges and universities as partners in educating the next generation of leaders in Connected Vehicles

Priority Audiences Over the Next 1 to 3 Years

- Federal Agencies
- Transportation Executives and General Managers
- Transportation Practitioners (including Engineers and Planners)
- Manufacturing/Industry
- IT/Communications
- Data Aggregators
- Automobile Manufacturers

Anticipated Audiences Over the Next 3 to 5 Years

- Insurance and Privacy Audiences
- Public Safety/Law Enforcement
- Freight/Commercial Vehicle Owners and Operators
- Media
- Advocacy Organizations

ITS in Academia
Case Studies

The ITS PCB Program is pleased to offer higher education instructors a new learning resource for the classroom. The ITS Case Study is a scenario-based learning tool that exposes students to real-world decisions that come with planning, deploying, and operating ITS technologies.

There are currently five case studies:

- Adaptive Signal Control
- Civil Design Considerations for ITS Implementations
- Concept of Operations Development as Part of a Systems Engineering Process
- National ITS Architecture
- Travel Time Based Performance Measures

Why Case Studies?
Results from the PCB Program's 2012 University Partners Workshop and webinar indicated that faculty supported U.S. DOT-sponsored case studies as a method for incorporating ITS content into existing Civil and Transportation Engineering courses. Case Studies expose students to ITS-related scenarios, from the perspective of different job roles, within transportation organizations. This exposure gives students an understanding of what it means to work as ITS professionals.

How to Access the Case Studies
ITS Case Studies are organized by instructor files (PowerPoints and PDFs of Word documents) and student files. Both sets of files include a study guide, a presentation on the technology, the actual case study, and the case study debrief.

- Instructors must register to gain access to the instructor files.
- Student files are available for anyone to view.

Each Case Study requires a separate registration.

Adaptive Signal Control Case Study			
Instructor files

Talking Technology and Transportation (T3) Webinars

The screenshot shows the website for the ITS Professional Capacity Building Program. The header includes the United States Department of Transportation logo and navigation links like 'About DOT', 'Briefing Room', and 'Our Activities'. The main navigation bar has categories such as 'About', 'ITS Training', 'Knowledge Exchange', 'Technology Transfer', 'ITS in Academics', and 'Media Library'. The main content area is titled 'ITS Courses and Training' and features a sidebar with links to 'Courses and Training', 'T3 Webinars', 'T3 Archive', and 'ITS Standards Training'. The main text describes the T3 webinars as free, 90-minute interactive sessions. It also lists two options: 'T3 Lites' and 'T3e'. A 'T3 Webinar Schedule' table and a 'Recent T3 Webinars' table are also present.

ITS Courses and Training

Talking Technology and Transportation (T3) Webinars

ITS Training Brought to Your Desktop

Talking Technology and Transportation (T3) Webinars are designed to help agencies feel confident about deploying ITS technologies as a means to address challenges in their transportation systems. These free, 90-minute, interactive online meetings offer knowledge sharing on topics related to ITS planning, design, procurement, deployment, and operations. The goal of the T3 Webinar Program is to increase the planning and technical capabilities of the ITS workforce, leading to a greater number of integrated, strategic, and effectively-deployed ITS system.

In addition to the standard 90-minute T3 webinar, the PCB Program is now offering two T3 webinar options: **T3 Lites** feature one presenter on a specific ITS-related topic or a student research project for 20-30 minutes followed by a question and answer period and **T3e** webinars focus on emerging research from academia.

T3 Webinar Schedule

Date	Time	T3 Webinar Title	Location	Sponsor
September 28, 2016	1:00-2:30 PM ET	Next Generation Traveler Information—Agency Social Media	Online	ITS PCB
October 5, 2016	1:00-2:30 PM ET	Strategies for Implementing Open and Mobile Payment Systems	Online	ITS PCB

Recent T3 Webinars

Date	T3 Webinar Title	Webinar Replay
August 3, 2016	Supporting Freight Operations with ITS	Available in September
July 28, 2016	Connected Vehicles and Rural Road Weather Management	Available in September
June 16, 2016	Network-Wide Impacts of Connected Vehicles on Mobility: An Agent-Based Modeling Approach	Available now
May 26, 2016	Sustainable Urban Traffic Management Using Advanced Technologies	Available now
May 10, 2016	Adapting to Climate Change Using Intelligent Transportation Systems	Available now
April 14, 2016	Give Your Customers More Mobility Options! Utilizing Technology in Coordinated Human Services Transportation Systems	Available now

U.S. Department of Transportation
ITS Joint Program Office

T3 Webinars and Archive

- Online, 90 minute, interactive seminars
- FREE by ITS PCB Program
- Past webinars available through T3 archive (3-4 weeks after live event)
- Professional Development Hours (PDHs) eligible
- Invite T3 Webinars proposal:
 - Highlight an ITS related case study, problem solving challenge, or topic
- To join announcement list:
 - Send email to T3@dot.gov with the subject line "Add to Email List."

Recent T3s (available now in archive):

- Traffic Incident Management - What's New?
- Variable Speed Limits Systems: Are They for Everyone?

Register at: <https://www.pcb.its.dot.gov>

T3 Webinar Series:

- Automated Vehicle Awareness Series (2015-2017)
- Open Payment Series (2016-2017)
- Mobility On Demand Series (2017-2019)
- Smart Cities Awareness Series (2017-2020)

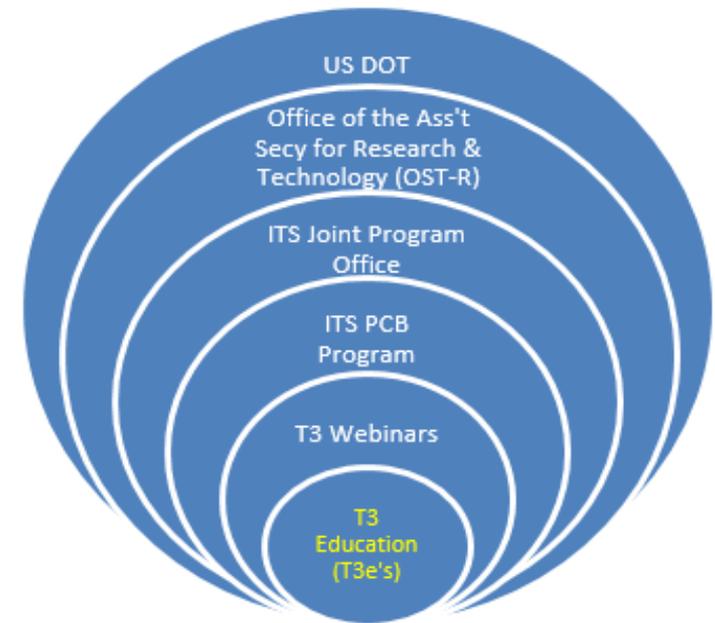

Talking Technology and Transportation in Education (T3e) Webinars

Purpose

T3e's are envisioned as a forum to bridge academic research with the larger transportation community. The goals are multifaceted and aim to:

- Allow transportation professionals to learn about emerging trends and interact with academia.
- Provide students an opportunity to present their work to the professional community and perfect their presentation skills.
- Offer an opportunity for academic institutions to showcase their programs and labs to a national audience.
- Provide those in all sectors with an opportunity to network and find synergy, potentially forming partnerships for deployment, operations, or new research topics.

T3e (education) Webinars

Format

- Focus on a specific ITS topic, theme, or subject area
- Up to 60-minutes in length--the first 25-40 minutes is devoted to presentations on relevant research, while the remaining time is set aside for an interactive question and answer discussion.
- Presenters may be university students, staff members, researchers, or professors but usually includes multiple presenters.
- T3e's present a unique forum for exchange between academia, government, and industry.

The screenshot displays the website for the ITS Professional Capacity Building Program, specifically the T3e webinars section. The page header includes the United States Department of Transportation logo and navigation links. The main content area is titled "ITS Courses and Training" and features a section for "Talking Technology and Transportation (T3) Webinars". It describes the purpose of these webinars and provides a "T3 Webinar Schedule" table. Below the schedule, there is a "Recent T3 Webinars" table listing past events with their dates, titles, and availability for replay. A "Missed a T3 Webinar?" link points to a T3 Webinar Archive. The "T3 Webinar Basics" section explains the format, including a 90-minute duration with a 30-minute Q&A period, and notes that past events are available in the archive. A small image of a man at a computer is visible in the bottom right corner of the screenshot.

T3e (education) Webinars

Process

- Because the T3e's are focused on academic research, unlike other T3 webinars, T3e presenters come exclusively from academia.
- In contrast to traditional T3's which are hosted by a federal DOT staff member, a professor will serve as the host on a T3e webinar.
- The T3e Webinar content is developed by the professor and presenters, who determine the topic(s) and learning objectives.
- All T3e's are produced by the Volpe Center T3 team who works with professors and students throughout.
- All T3e webinars are archived and available for viewing on the T3 website which presenters can access and share freely.

Spaces are available on the calendar for 2018!

Please speak to Jaime if you are interested.

T3e (education) Webinars

Sample of Past T3e's

- **Network-Wide Impacts of Connected Vehicles on Mobility: An Agent-Based Modeling Approach** | Oregon State University
- **Connected Vehicles and Rural Road Weather Management** | Univ of Wyoming
- **Solar-powered Automated Transit Networks: The Future of Sustainable Urban Transportation** | San Jose State University

Upcoming T3e's

- **Analysis of Freight Crashes along the I-10 Corridor: Potential ITS Countermeasures** | Northern Arizona University – September 26, 2017
- **Title** | University of Tennessee, October 11, 2017

ITS Curriculum Webpage

Purpose

To publish information about ITS courses in order to provide:

- Prospective graduate & undergraduate students interested in ITS with a “one-stop-shop” resource with information on university ITS programs & courses; and
- Educators with a platform to feature their ITS courses and an opportunity to informally network with other educators, exchanging lesson plans and best practices.

You can help develop this into a meaningful resource by providing us with:

- A list of your ITS courses, along with one or two web links to course descriptions/information
- A two-to-three sentence description that sums up ITS-related initiatives at your institution
- A university point of contact, and
- A university logo that we can publish on our website.

ITS Curriculum Resources

This page features an ever-growing list of educational institutions (universities, community colleges, technical schools, and other institutions) that offer coursework in ITS, connected vehicles, automated vehicles, smart cities, or other innovative transportation research, and provides links to curriculum information and ITS-centric programs. Designed to be a nationwide resource for educators and prospective students, it aims to provide a platform for institutions to feature ITS courses and an opportunity to informally network.

- University of Texas, Dallas or Austin	TX	Graduate	Thematic Area of Transportation Engineering
<p>Department: Civil Engineering</p> <p>Program: Thematic Area of Transportation Engineering</p> <p>Description: The University's proximity to the headquarters of governmental transportation agencies provides ready access to the facilities and records of these organizations by graduate students, in planning, behavioral modeling and demand prediction, geometric and structural design, large-scale infrastructure systems analysis and optimal resource allocations, policy making, and operation of streets, highways, and transit and non-motorized transportation systems. The Center for Transportation Research administers an extensive cooperative research program with the Texas Department of Transportation, the United States Department of Transportation, as well as a spectrum of sponsored projects with other agencies, including the Transportation Research Board, and the National Science Foundation. Equipment for specialized and routine testing of materials used for constructing and maintaining transportation facilities is available. The bituminous materials laboratory includes state-of-the-art asphalt binder and asphalt concrete testing equipment, an environmental control chamber, and mix preparation and aggregate handling facilities. Facilities are provided for studying traffic operations, including traffic volume counters, speed meters, motor-driven movie cameras, video cameras and recorders, projectors, portable delay recorders, and other special measuring and recording equipment. The Transportation Infrastructure and Information Systems Laboratory provides the capability to conduct research in analysis and simulation of large-scale infrastructure systems. The Transportation Equilibrium, Simulation, and Optimized Networks Laboratory allows research on large-scale complex networks with a focus on transportation systems. In addition, the University's high-performance computers and hardware and software in the department's Learning Resources Center are available to support research in transportation networks, infrastructure systems, land uses, and traffic operations.</p> <p>Links: http://catalog.utexas.edu/graduate/fields-of-study/engineering/civil-engineering/graduate-courses/</p> <p>Research Center: Center for Transportation Research</p> <p>ITS Courses: CE 197 – Special Topics in Civil Engineering: Topic 22 Intelligent Transportation Systems. Organized by state, clicking on a school listed expands to show details about the program that offers ITS coursework.

This is envisioned as a resource for all levels of higher education, and aims to incorporate community colleges, tech, and trade schools.

ITS Standards / ITS Transit Standards

- FREE, 1.5-2 hour modules that teach how to procure, implement, and operate ITS standards-based devices
- First posted 2013
- 56 general ITS Standards Training Modules online
- 21 ITS Transit Standards Training online
- New as of this year
 - 8 ITS Standards
 - 10 ITS Transit Standards
 - 8 ITS Standards updated

The screenshot shows the website for the ITS Standards Training program. The header includes the United States Department of Transportation logo and navigation links for About DOT, Briefing Room, Our Activities, About OST-R, Press Room, Programs, OST-R Publications, Library, and Contact Us. The main heading is "Intelligent Transportation Systems Joint Program Office" with a search bar for the PCB website. Below this is a navigation menu with "About", "ITS Training", "Knowledge Exchange", "ITS in Academics", and "Media Library". The main content area is titled "ITS Courses and Training" and includes sections for "ITS Courses and Training" (with links to Courses and Training, T3 Webinars, T3 Archive, and ITS Standards Training), "Free ITS Technical Assistance" (with links to ITS Peer-to-Peer Program and email support), and "Stay Connected" (with social media icons for Facebook, Twitter, and Email). A callout box on the right asks "Why Should You Take ITS Standards Training?" and explains that agencies using standards have a greater capacity to share data and coordinate services across different transportation modes. It mentions that the 90-minute training modules discuss topics related to purchasing, testing, implementing, and operating standards-based ITS equipment and systems. Links are provided to get started with the 51-module training series and the 21-module transit training series.

ITS ePrimer

Welcome to the ITS ePrimer!
The ITS ePrimer provides transportation professionals with fundamental concepts and practices related to ITS technologies. This online resource can help practicing professionals and students better understand how ITS is integrated into the planning, design, deployment, and operations of surface transportation systems. The ITS ePrimer is both a stand-alone reference document for the practitioner as well as a text for education and training programs.

Please use the option to send feedback as you read through the ePrimer. The ITS PCB Program welcomes your comments and suggestions.

To view a module, click its plus button +.

What is CITE?

- Consortium for ITS Training and Education
- A unique consortium of over 100 university and industry partners
- Provide interactive online advanced transportation courses
- Types of offerings
 - Certificate Programs
 - Independent Study Courses
 - Blended Courses
 - Full Semester Courses

CITE'S AUDIENCE

- College/University Students
 - Courses taken from University Partners
 - College credit given for completion through partners
- Industry professionals
 - Courses taken directly through CITE
 - CEU's given for completion

NEWEST COURSES AVAILABLE

- Archived Data for Planning, Operations and Safety
